---

We provide complete network monitoring solutions based both on commercial (HP OV, Infovista, Netcool, etc) and open products (Zabbix, Zenoss, NTOP) for network elements monitoring and NetProbe IQM SLA for IP quality management. The combined solution could solve several tasks:

1. Data acquisition of resources and services parameters and data.
2. Automatic data processing including analysis, logging, integral QM, deduplication, alerts, etc.
3. Automatic trouble ticketing.
4. OSS/BSS interaction thru common interfaces or API.
5. Data presentation thru GUI, showing process/service status, etc
6. Alert triggering and information.
